Low Level Design ⌄

TEST.C

Test whether the output of the
code matches expected value with ☆
assert.

The variables.c is a pre-requisite for ☆
test.c

main.c

Incrementally calculate GPA as the ☆
user enters grades and credits.

variables.c

Declare total number of subjects, ☆
array for grade, array for credits.

Makefile

Write Makefile which include ☆
linking the files and generates
executables for github actions.
